

Sabrina Van Schyndel

Born and raised in Carleton Place, ON, Sabrina Van Schyndel is a recent graduate from University of Guelph, where she completed a Bachelor of Science in Animal Biology. She is continuing her education as a graduate student, pursuing a Master of Science degree, examining metabolic disorders in dairy cattle. She was a research student involved in the National Dairy Study 2015 and has spent 6 months assisting with a white veal calf study analyzing health characteristics upon arrival. Growing up with special interests in livestock health and medicine, she hopes to utilize her education to positively impact the dairy industry and livestock production as a whole.

Sabrina Van Schyndel is a 2016 recipient of the **Ronald A. Chisholm Undergraduate Scholarship.**
