

Are you a "bio-computing junky"?

You have completed or are about to complete your graduate studies?

You have a solid training in microbiology or in another life science field?

You work in molecular biology & bioinformatics and want to stay in research?

You are interested in public health and a career in the agri-food sector is part of your objectives?

There is a place for you in Animal Sciences. We are currently recruiting a candidate with a solid training in molecular biology for a post-doctoral position in meat quality and hygiene. The candidate must be interested in experimental design on farms, with animals and in abattoirs. Professors Frédéric Raymond and Antony Vincent are also collaborating on the projects.

Send a motivation letter, a CV as well as university transcripts:

Linda Saucier Ph.D., agr., chm.
